-

Item 8.01. Other Events.

Cleveland-Cliffs Inc published a News Release on September 14, 2004 as follows:

CLIFFS' BOARD APPROVES RESTART OF IDLE PELLET CAPACITY

CLEVELAND, OH – September 14, 2004 - Cleveland-Cliffs Inc (NYSE:CLF) announced today that its Board of Directors has approved capital expenditures for major capacity expansion projects planned at its United Taconite Mine in Eveleth, Minnesota and Northshore Mine in Silver Bay, Minnesota.

Board approval has been given to proceed with the planned restart of the idled pellet furnace at United Taconite. The furnace would be brought on line in the fourth quarter of 2004 and would have an annual production capacity of approximately 1,000,000 tons of pellets. The cost of the expansion project is estimated at \$23 million.

Cliffs' Board also approved the Company's planned restart of an idled furnace at its Northshore facility in Silver Bay, Minnesota. Restart of the furnace is planned for mid-2005, and it would have an annual production capacity of approximately 800,000 tons of pellets. Total capital cost of this project is roughly \$29 million.

Cleveland-Cliffs Inc, headquartered in Cleveland, Ohio, is the largest producer of iron ore pellets in North America and sells the majority of its pellets to integrated steel companies in the United States and Canada. The Company operates six iron ore mines located in Michigan, Minnesota and Eastern Canada.

References in this news release to "Cliffs" and "Company" include subsidiaries and affiliates as appropriate in the context.

This news release contains predictive statements that are intended as "forward-looking" within the safe harbor protections of the Private Securities Litigation Reform Act of 1995. Although the Company believes that its forward-looking statements are based on reasonable assumptions, such statements are subject to risks and uncertainties.

Actual results may differ materially from such statements for a variety of factors, such as: changes in laws and regulations negatively impacting the reactivation of the idle furnaces and the related increases in concentrate production; the failure to obtain required environmental permits in a timely manner; inability to generate sufficient concentrate to support the reactivated furnaces; increases in the cost and length of time required for the reactivation; lack of available transportation equipment for ore or pellets; decreases in the demand for steel and iron ore related products; and the impact of customer bankruptcies on our business. Reference is also made to other factors and risks that may cause such forward-looking statements to turn out differently, as set forth in the Company's Annual Report for 2003 and reports on Forms 10-K and 10-Q and in previous news releases filed with the Securities and Exchange Commission, which are available publicly on Cliffs' website. The information contained in this document speaks as of the date of this news release and may be superseded by subsequent events.

SIGNATURES
